#### **Scope and Content**

The materials in FOIA 2016-0422-F are a selective, not necessarily all inclusive, body of documents responsive to the topic of the FOIA. Researchers should consult the archivist about related materials.

FOIA 2016-0422-F requested materials related to President George W. Bush's use of 26 U.S. Code § 6103 (g).

This FOIA primarily contains printed emails, routine memorandum, outlines, routine correspondence, printed newsletters, printed webpages, invitations, factual PowerPoint presentations, and reports. Electronic records consist of administrative emails between IRS staff and the White House, copies of the Treasury Department Report to the Congress on Scope and Use of Taxpayer Confidentiality and Disclosure Provisions Volume I, and the National Taxpayer Advocate 2003 Annual Report to Congress.

Please note that a portion of classified records related to this request has not yet been processed. Additional records will be provided as they become available.

### **System of Arrangement**

The materials in FOIA 2016-0422-F are a systematic body of documents responsive to the topic of the FOIA. Researchers should consult an archivist about related materials.

Documents responsive to this FOIA were found in these collection areas – White House Office of Records Management (WHORM) Subject Files, Staff Member Office Files, and George W. Bush Presidential Electronic Records.

WHORM Subject Files are processed at the document level.

The WHORM Subject File compiled by the White House Office of Records Management is comprised of a series of documents assigned a letter/number combination and filed in a subject category. A complete listing of the subject categories including a detailed description of each category is available in our research room and on our website at [www.georgewbushlibrary.smu.edu](http://www.georgewbushlibrary.smu.edu).

Staff Member Office Files are maintained at the folder level by staff members within their individual offices and document all levels of administration activity.

Staff Member Office Files are processed at the folder level, that is, individual documents are not selected and removed from a folder for processing. While this method maintains folder integrity, it frequently results in the incidental processing of documents that are not wholly responsive to the subject area.

The Executive Office of the President (EOP) instance of the Electronic Records Archive (ERA) contains electronic records created or received by President George W. Bush. These records are stored in Search and Access Sets (SAS) that represent their originating computer program, such as Exchange Email or the Worker and Visitor Entry System (WAVES). In addition to records captured from the White House's electronic systems, EOP-ERA also contains records from the home and shared drives used by White House staff.
