Issues

Page 3, 3rd full paragraph, "We remain on the offensive in Afghanistan – where a fine president and general assembly are fighting terror while building the institutions of a new democracy."

This needs to be changed to National Assembly. Kurt Amend, Director for Afghanistan, NSC said this change is necessary. He also says that the "National Assembly isn't helping to fight terror; Karzai, the military and police are fighting terror."

Page 3, 4th full paragraph, "A young man from Tikrit who is with us tonight joined the very first unit of the new Iraqi Army."

As discussed, this will need to be adjusted.

Page 3, 4th full paragraph, "We are honored to welcome Lieutenant Colonel Yousif."

As discussed, this will need to be adjusted to read Lieutenant Colonel Musab Yousif.

Page 6, paragraph 3, sentence 3: "If our government had intercepted these calls, we might have been able to stop the attacks."

We understand that there was some debate about the accuracy of this statement. Harriet Miers and Mike Hayden (DNI) have expressed their reservations with the language. Please double check the accuracy.

Again, we wish to underline the importance of assuring the accuracy in this entire paragraph. We do not know if the concerns of Hayden and Miers have been satisfied.

page 7, 4th full paragraph, sentence: "Tonight I will set out a better path – an agenda for a nation that competes with confidence – an agenda that will raise standards of living and generate new jobs."

Still need to confirm "... generate new jobs"

Page 8, top paragraph, sentence: "In the last five years, the tax relief you passed has left 880 billion dollars in the hands of American workers, investors, small businesses, and families – and they have used it to help produce more than four years of uninterrupted economic growth."

We have backup for this line, see footnotes #95 and #96. However, we can not confirm that "the tax relief you passed" CAUSED Americans to "produce more than four years of uninterrupted economic growth."

Page 8, 2nd full paragraph, sentence: "By passing these reforms, we will save the American taxpayer another 15 billion dollars next year – and stay on track to cut the deficit in half by 2009."

The total amount saved will be -\$14.7 billion. Should we say "NEARLY 15 billion"? See footnote #103.

Page 9, 3rd full paragraph, sentence: "Our government has a responsibility to help provide health care for the poor and the elderly, and we are meeting that responsibility."

Keith Hennessey recommends that we change the line to read, "and we WILL MEET that responsibility."

Page 9, 3rd full paragraph, sentence: "We will strengthen Health Savings Accounts – by making sure individuals and small business employees can buy insurance with the same advantages that people working for big businesses now get."

Keith Hennessey says that the only way to make this line factually accurate is to add, "tax" "with the same TAX advantages that people working for big businesses now get."

Page 10, top paragraph, sentence: " – and we are on the threshold of incredible advances."

This language was added in the final draft and we still need confirmation from Keith Hennessey.

Page 10, first full paragraph, sentence: "Our goal is to make this new kind of ethanol practical and competitive within six years. Breakthroughs on this and other new technologies will help us reach another great goal: to replace more than 75 percent of our oil imports from the Middle East by 2025."

This information is correct but the language was slightly altered in the final draft and we still need confirmation from Keith Hennessey. See footnote #141

Page 11, paragraph 4, sentence: Drug abuse among youth is down 19 percent since 2001.

- Terry Zobeck, Deputy Associate Director, Planning and Budget, ONDCP, recommends saying drug "use" instead of drug abuse. The statistics and data from the Monitoring the Future study, measured habits of youth drug use, not drug abuse.

State of the Union Address

Draft #31

Mr. Speaker,¹ Vice President Cheney,² Members of Congress,³ Members of the Supreme Court⁴ and diplomatic corps,⁵ distinguished guests,⁶ and fellow citizens⁷:

Each time I am invited to this rostrum, I am humbled by the privilege, and mindful of the history we have seen together. We have gathered under this Capitol dome in moments of national mourning and national achievement. We have served America through one of the most consequential periods of our history – and it has been my honor to serve with you.

¹ THE PRESIDENT: “Mr. **Speaker**, Vice President Cheney, members of Congress, fellow citizens: As a new Congress gathers, all of us in the elected branches of government share a great privilege: We’ve been placed in office by the votes of the people we serve. And tonight that is a privilege we share with newly-elected leaders of Afghanistan, the Palestinian Territories, Ukraine, and a free and sovereign Iraq.” (Applause.) ⁶ THE PRESIDENT: “Mr. Speaker, Vice President Cheney, members of Congress, **distinguished guests**, and fellow citizens: America this evening is a nation called to great responsibilities. And we are rising to meet them.” **State of the Union Address**, United States Capitol, Washington, D.C., January 20, 2004 (<http://www.whitehouse.gov/news/releases/2004/01/20040120-7.html>)

⁷ THE PRESIDENT: “Mr. Speaker, Vice President Cheney, members of Congress, **fellow citizens**: As a new Congress gathers, all of us in the elected branches of government share a great privilege: We’ve been placed in office by the votes of the people we serve. And tonight that is a privilege we share with newly-elected leaders of Afghanistan, the Palestinian Territories, Ukraine, and a free and sovereign Iraq.” (Applause.) In a system of two parties, two chambers, and two elected branches, there will always be differences and debate. But even tough debates can be conducted in a civil tone, and differences cannot be allowed to harden into anger. To confront the great issues before us, we must act in a spirit of good will and respect for one another – and I will do my part. Tonight the state of our union is strong – and together we will make it stronger.

In this decisive year, you and I will make choices that determine both the future and the character of our country. We will choose to act confidently in pursuing the enemies of freedom – or retreat from our duties in the hope of an easier life. We will choose to build our prosperity by leading the world economy – or shut ourselves off from trade and opportunity. In a complex and challenging time, the road of isolationism and protectionism may seem broad and inviting – yet it ends in danger and decline. The only way to protect our people ... the only way to secure the peace ... the only way to control our destiny is by our leadership – so the United States of America will continue to lead.

Abroad, our nation is committed to an historic, long-term goal – we seek the end of tyranny in our world. Some dismiss that goal as misguided idealism. In reality, the future security of America depends on it. On September 11th, 2001, we found that problems originating in a failed and oppressive state seven thousand miles away⁸ could bring murder and destruction to our country. Dictatorships shelter terrorists, feed resentment and radicalism, and seek weapons of mass destruction. Democracies replace resentment with hope, respect the rights of their citizens and their neighbors, and join the fight against terror. Every step toward freedom in the world makes our country safer, and so we will act boldly in freedom's cause.

Far from being a hopeless dream, the advance of freedom is the great story of our time. In 1945,⁹ there were about two dozen lonely democracies on Earth.¹⁰ Today, there are 122.¹¹ And we are writing a new chapter in the story of self-government – with women lining up to vote in Afghanistan¹² ... and millions of Iraqis marking their liberty with purple ink¹³ ... and men and women from Lebanon to Egypt debating the rights of individuals and the necessity of freedom.¹⁴ At the start of 2006, more than half¹⁵ the people of our world¹⁶ live in democratic nations.¹⁷ And we do not

forget the other half – in places like Syria,¹⁸ Burma,¹⁹ Zimbabwe,²⁰ North Korea,²¹ and Iran²² – because the demands of justice, and the peace of this world, require their freedom as well.

No one can deny the success of freedom, but some men rage and fight against it. And one of the main sources of reaction and opposition is radical Islam – the perversion by a few of a noble faith into an ideology of terror and death. Terrorists like bin Laden are serious about mass murder – and all of us must take their declared intentions seriously. They seek to expel free nations from the Middle East, seize power in Iraq, impose a heartless system of totalitarian control, and arm themselves with weapons of mass murder. Lacking the military strength to challenge us directly, the terrorists have chosen the weapon of fear. When they murder children at a school in Beslan²³ ... or blow up commuters in London ... or behead a bound captive ... the terrorists hope these horrors will break our will, allowing the violent to inherit the Earth. But they have miscalculated: We love our freedom, and we will fight to keep it.

²³ “A shaken President Vladimir Putin made a rare and candid admission of Russian weakness in the face of an “all-out war” by terrorists after **more than 350 people - nearly half of them children - were killed in a hostage-taking at a school in southern Russia**.... Shocked relatives wandered among row after row of bodies lined up in black plastic or clear body bags on the pavement at a morgue in Vladikavkaz, the capital of North Ossetia, where the dead from the school standoff in **Beslan** were taken. In some open bags lay the contorted, thin bodies of **children**, some monstrously charred.” Mike Eckel, “Putin vows tough response to “all-out war” by terrorists as death toll in school rises above 340,” Associated Press (AP), September 4, 2004 (Nexis)

In a time of testing, we cannot find security by abandoning our commitments and retreating within our borders. If we were to leave these vicious attackers alone, they would not leave us alone. They would simply move the battlefield to our own shores. There is no peace in retreat. And there is no honor in retreat. By allowing radical Islam to work its will – by leaving an assaulted world to fend for itself – we would signal to all that we no longer believe in our own ideals, or even in our own courage. But our enemies and our friends can be certain: The United States will not retreat from the world, and we will never surrender to evil.

America rejects the false comfort of isolationism. We are the nation that saved liberty in Europe, and liberated death camps, and helped raise up democracies, and faced down an evil empire. Once again, we accept the call of history to deliver the oppressed, and move this world toward peace.

We remain on the offensive against terror networks. We have killed or captured many of their leaders – and for the others, their day will come.

We remain on the offensive in Afghanistan²⁴ – where a fine president²⁵ and general assembly²⁶ are fighting terror while building the institutions of a new democracy.²⁷

And we are on the offensive in Iraq, with a clear plan for victory. First, we are helping Iraqis build an inclusive government,²⁸ so that old resentments will be eased,²⁹ and the insurgency marginalized.³⁰ Second,

³⁶ "Our strategy in Iraq has three elements. On the political side, we know that free societies are peaceful societies, so we're helping the Iraqis build a free society with inclusive democratic institutions that will protect the interests of all Iraqis. We're working with the Iraqis to help them engage those who can be persuaded to join the new Iraq -- and to marginalize those who never will. **On the security side, coalition and Iraqi security forces are on the offensive against the enemy, cleaning out areas controlled by the terrorists and Saddam loyalists, leaving Iraqi forces to hold territory taken from the enemy,** and following up with targeted reconstruction to help Iraqis rebuild their lives.

As we fight the terrorists, we're working to build capable and effective Iraqi security forces, so they can take the lead in the fight -- and eventually take responsibility for the safety and security of their citizens without major foreign assistance." ³⁹ "He joined the Iraqi Civil Defense Corps battalion formed in Salahaddin province in August 2003 in the first training class for this ICDC unit. In 2004, the Iraqi government incorporated all ICDC battalions into the Iraqi army, and at that time he became an Iraqi army officer as opposed to an officer in a civil defense corps unit. Thus **it would be incorrect to say he joined the very first Iraqi army unit. You could say he took the first opportunity to sign up to defend his country,** or something like that." Information provided by Charles Dunne, Director for Iraq, NSC (69381); According to Maj. Thomas A. McNally, who is serving as Lt. Col. Musab Yousif's handler, he thinks that Yousif's unit was one of the first in Iraq, but he's not absolutely sure. He also says that he's not sure that

⁴⁰ but his commitment to Iraq's freedom is unshaken. We are honored to welcome **Lieutenant Colonel Yousif**.⁴¹ Colonel, the people of Iraq are showing courage every day, and we are proud to be your allies in the cause of freedom.

Our work in Iraq is difficult, because our enemy is brutal. But that brutality has not stopped the dramatic progress of a new democracy. In less than three years, that nation has gone from dictatorship, to liberation, to sovereignty, to a Constitution, to national elections.⁴² At the same time, our coalition has been relentless in shutting off terrorist infiltration, clearing out insurgent strongholds, and turning over territory to Iraqi security forces. I am confident in our plan for victory ... I am confident in the will of the Iraqi people ... I am confident in the skill and spirit of our military. Fellow citizens, we are in this fight to win, and we are winning.

The road of victory is the road that will take our troops home. As we make progress on the ground, and Iraqi forces increasingly take the lead, we should be able to further decrease our troop levels – but those decisions will be made by our military commanders, not by politicians in Washington, DC.⁴³

Yousif would have had the "visibility" to know whether or not he was joining one of the first units of the new Iraqi Army. Maj. McNally can confirm that Yousif's unit in Salahaddin province was the first to "stand up" in that location.

He will be with Yousif at 8am this morning and will ask him the question then (and call us with an answer), but his belief is that Yousif would not have known whether his Army unit was one of the firsts.

Our coalition has learned from experience in Iraq. We have adjusted our military tactics and changed our approach to reconstruction. Along the way, we have benefited from responsible criticism and counsel offered by Members of Congress of both parties. In the coming year, I will continue to reach out and seek your good advice.

Yet there is a difference between responsible criticism that aims for success, and defeatism that refuses to acknowledge anything but failure. Hindsight alone is not wisdom. And second-guessing is not a strategy.

With so much in the balance, those of us in public office have a duty to speak with candor. A sudden withdrawal of our forces from Iraq would abandon our Iraqi allies to death and prison ... put men like bin Laden and Zarqawi in charge of a strategic country⁴⁴ ... and show that a pledge from America means little. Members of Congress: however we feel about the decisions and debates of the past, our nation has only one option: We must keep our word, defeat our enemies, and stand behind the American military in its vital mission.

Our men and women in uniform are making sacrifices – and showing a sense of duty stronger than all fear. They know what it is like to fight house to house in a maze of streets ... to wear heavy gear in the desert heat ... to see a comrade killed by a roadside bomb. And those who know the costs also know the stakes. Marine Staff Sergeant Dan Clay⁴⁵ was killed last month⁴⁶ fighting the enemy in Fallujah. ⁴⁷ He left behind a letter

to his family,⁴⁸ but his words could just as well be addressed to every American. Here is what Dan wrote: "I know what honor is. It has been an honor to protect and serve all of you. I faced death with the secure knowledge that you would not have to.... Never falter! Don't hesitate to honor and support those of us who have the honor of protecting that which is worth protecting."⁴⁹

Staff Sergeant Dan Clay's wife, Lisa, and his mom and dad, Sara Jo and Bud, are with us this evening.⁵⁰ Our nation is grateful to the fallen, who live in the memory of our country. We are grateful to all who volunteer to wear our nation's uniform – and as we honor our brave troops, let us never forget the sacrifices of America's military families.

Our offensive against terror involves more than military action. Ultimately, the only way to defeat the terrorists is to defeat their dark vision of hatred and fear by offering the hopeful alternative of political freedom and peaceful change.⁵¹ So the United States of America supports democratic reform across the broader Middle East.⁵² Elections are vital – but they are only the beginning. Raising up a democracy requires the rule

⁴⁹ "This I am so thankful for. **I know what honor is.** It is not a word to be thrown around. **It has been an Honor to protect and serve all of you. I faced death with the secure knowledge that you would not have to.** This is as close to Christ-like I can be. That emulation is where all honor lies. I thank you for making it worth while. As a Marine this is not the last Chapter. I have the privilege of being one who has finished the race. I have been in the company of heroes. I now am counted among them. **Never falter! Don't hesitate to honor and support those of us who have the honor of protecting that which is worth protecting.** Now here are my final wishes. Do Not Cry! To do so is to not realize what we have placed all our hope and faith in. We should not fear." To overcome dangers in our world, we must also take the offensive by encouraging economic progress, fighting disease, and spreading hope in hopeless lands.⁶⁹ Isolationism would not only tie our hands in fighting enemies, it would keep us from helping our friends in desperate need. We show compassion abroad because Americans believe in the God-given dignity and worth of a villager with HIV/AIDS, or an infant with malaria, or a refugee fleeing genocide, or a young girl sold into slavery. We also show compassion abroad because regions overwhelmed by poverty, corruption, and despair are sources of terrorism, organized crime, human trafficking, and the drug trade.⁷⁰

In recent years, you and I have taken unprecedented action to fight AIDS and malaria, expand the education of girls, and reward developing nations that are moving forward with economic and political reform.⁷¹ For people everywhere, the United States is a partner for a better life. disasters, the American people have turned in an economic performance that is the envy of the world.⁹⁰

The American economy is pre-eminent – but we cannot afford to be complacent. In a dynamic world economy, we are seeing new competitors like China and India. This creates uncertainty, which makes it easier to feed people's fears. And so we are seeing some old temptations return. Protectionists want to escape competition, pretending that we can keep our high standard of living while walling off our economy.⁹¹ Others say that the government needs to take a larger role in directing the economy, centralizing more power in Washington and increasing taxes.⁹² We hear claims that immigrants are somehow bad for the economy – even though this economy could not function without them.⁹³ All these are forms of economic retreat, and they lead in the same direction – toward a stagnant and second-rate economy.

Tonight I will set out a better path – an agenda for a nation that competes with confidence – an agenda that will raise standards of living

and generate new jobs. Americans should not fear our economic future, because we intend to shape it.

Keeping America competitive begins with keeping our economy growing. And our economy grows when Americans have more of their own money to spend, save, and invest.⁹⁴ In the last five years, the tax relief you passed has left 880 billion dollars in the hands of American workers, investors, small businesses, and families⁹⁵ – and they have used it to help produce more than four years of uninterrupted economic growth.⁹⁶ Yet the tax relief is set to expire in the next few years.⁹⁷ If we do nothing, American families will face a massive tax increase they do not expect and will not welcome.⁹⁸

Because America needs more than a temporary expansion, we need more than temporary tax relief. I urge the Congress to act responsibly, and make the tax cuts permanent.

Keeping America competitive requires us to be good stewards of tax dollars. Every year of my presidency, we have reduced the growth of non-security discretionary spending⁹⁹ – and last year you passed bills that cut

As you know, there's a popular outcry to do so. Why not have the White House come out against the earmarks? They're pork barrel earmarks. They've really allowed cash for legislative favors. In some sense, they're at the heart of the corruption. What's your own view on the earmark issue?** THE VICE PRESIDENT: **I think the earmarks are a problem. I know from my time of running the Defense Department 15 years ago, it was frustrating then to be told by the Congress to specify spending amounts that had nothing to do with national security but were all geared to satisfy some member of Congress's political needs and requirements. And it has gotten much worse. The bill when I -- the authorization bill at Defense used to be about 70 or 80 pages long 50 years ago. Now it's hundreds of pages long because of earmarks. The real fiscal danger is posed by the long-term unfunded obligations of the Social Security, Medicare, and other entitlement programs.** Spending decisions on entitlements often have ramifications on the budget outlook far beyond the conventional 10-year window used to score changes in policy. Enforcement mechanisms are needed to address the long-term impact of entitlement spending expansions. Second: I propose to make permanent the research and development tax credit, to encourage bolder private-sector investment in technology.¹⁴⁷ With more research in both the public and private sectors, we will improve our quality of life – and ensure that America will lead the world in opportunity and innovation for decades to come.

Third: We need to encourage children to take more math and science, and make sure those courses are rigorous enough to compete with other nations. We have made a good start in the early grades with the No Child Left Behind Act, which is raising standards and lifting test scores across our country.¹⁴⁸ Tonight I propose to train 70,000 high school teachers, to lead advanced-placement courses in math and science

¹⁵⁵ Information confirmed by Terry Zobeck, Deputy Associate Director, Planning and Budget, ONDCP, (5-5503). **The actual drop is 19.1 percent. The data are for teens (8th, 10th, and 12th graders) and are taken from the Monitoring the Future (MTF) study, conducted by the University of Michigan's Institute for Social Research, and funded by the National Institute on Drug Abuse.** Drug use among the general population has been relatively flat for the past five years. Despite this, ONDCP claims that this statistic is still very powerful because drug use among youth is indicative of future drug use. **Note: the text should read drug “use,” according to Terry Zobeck, confirmed via telephone with Brendon Merkley on January 30, 2006.**

These gains are evidence of a quiet transformation – a revolution of conscience, in which a rising generation is finding that a life of personal responsibility is a life of fulfillment. Government has played a role. Wise policies such as welfare reform, drug education, and support for abstinence and adoption have made a difference in the character of our country. And everyone here tonight, Democrat and Republican, has a right to be proud of this record.

Yet many Americans, especially parents, still have deep concerns about the direction of our culture, and the health of our most basic institutions. They are concerned about unethical conduct by public officials, and discouraged by activist courts that try to redefine marriage. And they worry about children in our society who need direction and love ... fellow citizens still displaced by natural disaster ... and suffering caused by treatable disease.

As we look at these challenges, we must never give in to the belief that America is in decline, or that our culture is doomed to unravel. The American people know better than that. We have proven the pessimists wrong before – and we will do it again.

A hopeful society depends on courts that deliver equal justice under law. The Supreme Court now has two superb new members, Chief Justice

Please see “11. Abortion Statistics” in appendix for a chart of abortion statistics by year and further analysis.

¹⁵⁷ Information confirmed by Ryan Streeter, Special Assistant to the President for Domestic Policy (Welfare and Housing), Domestic Policy Council, (67128). **“The rate has plummeted by one-third since the 1991 peak (61.8). The rate for ages 15-17 years was 22.4 per 1000, 42% lower than in 1991, and the rate for ages 18-19 years was 70.7 per 1,000, 25% lower than in 1991. Declines in rates have been especially striking for black teenagers; their overall rate dropped 45% since 1991, whereas the rate for young black females 15-17 years has plunged more than half.** Rate declines for all teenagers was substantial enough to more than compensate for the increased number of female teenagers, so that the number of births to women under 20 years dropped to the fewest since 1946, the first year of the baby boom.” US Department of Health and Human Services, National Center for Health Statistics, National Vital Statistics Reports, Volume 54, Number 2 – Births: Final Data for 2003, Pg. 2. **Note:** H.H.S. document “National Vital Statistics Reports – Births: Final Data for 2003” contains a chart that shows a discernibly declining number of births for mothers aged 15-19 years. This document will be added to annotated draft. There is also a document from the National Campaign to Prevent Teen Pregnancy that catalogues the Teen Birth Rates in the United States, 1940-2004. This shows the discernible decrease in teen births every year from 1991-2004. This will also be included with the final annotated.

John Roberts¹⁵⁸ and Justice Sam Alito.¹⁵⁹ I thank the Senate for confirming both of them.¹⁶⁰ And I will continue to nominate men and women who understand that judges must be servants of the law, and not legislate from the bench. A hopeful society expects elected officials to uphold the public trust. Honorable people in both parties are working on reforms¹⁶⁷ to strengthen the ethical standards of Washington – and I support your efforts. Each of us has made a pledge to be worthy of public responsibility – and that is a pledge we must never forget, never dismiss, and never betray.

As we renew the promise of our institutions, let us also show the character of America in our compassion and care for one another.

A hopeful society gives special attention to children who lack direction and love. Through the Helping America's Youth initiative¹⁶⁸, we are encouraging caring adults to get involved in the life of a child – and this good work is led by our First Lady, Laura Bush.¹⁶⁹ This year we will add

A hopeful society comes to the aid of fellow citizens in times of suffering and emergency – and stays at it until they are back on their feet. So far the federal government has committed 85 billion dollars to the people of the Gulf Coast and New Orleans.¹⁷¹ We are removing debris¹⁷², repairing highways¹⁷³, and building stronger levees¹⁷⁴ – and providing business loans¹⁷⁵ and housing assistance¹⁷⁶. Yet as we meet these immediate needs, we must also address deeper challenges that existed before the storm arrived. In New Orleans and in other places, many of our

fellow citizens have felt excluded from the promise of our country. The answer is not only temporary relief, but schools that teach every child ... and job skills that bring upward mobility ... and more opportunities to own a home and start a business. As we recover from a disaster, let us also work for the day when all Americans are protected by justice, equal in hope, and rich in opportunity.

A hopeful society acts boldly to fight diseases like HIV/AIDS, which can be prevented, and treated, and defeated. More than a million Americans live with HIV¹⁷⁷, and half of all AIDS cases occur among African-Americans.¹⁷⁸ I ask Congress to reform and reauthorize the Ryan White Act ... and provide new funding to states, so we end the waiting lists for AIDS medicine in America.¹⁷⁹ We will also lead a nationwide effort, working closely with African-American churches and faith-based groups, to deliver rapid HIV tests to millions¹⁸⁰, end the stigma of AIDS, and come closer to the day when there are no new infections in America.

Fellow citizens, we have been called to leadership in a period of consequence. We have entered a great ideological conflict we did nothing to invite. We see great changes in science and commerce that will

influence all our lives. And sometimes it can seem that history is turning in a wide arc, toward an unknown shore.

Yet the destination of history is determined by human action, and every great movement comes to a point of choosing. Lincoln could have accepted peace at the cost of disunity and continued slavery. Martin Luther King could have stopped at Birmingham or at Selma, and achieved only half a victory over segregation. The United States could have accepted the permanent division of Europe, and been complicit in the oppression of others. Today, having come far in our own historical journey, we must decide: Will we turn back, or finish well?

Before history is written down in books, it is written in courage. Like Americans before us, we will show that courage and we will finish well. We will lead freedom's advance. We will compete and excel in the global economy. We will renew the defining moral commitments of this land. And so we move forward – optimistic about our country, faithful to its cause, and confident of victories to come. Thank you, God bless you, and may God bless America.

Foreign Operations Appropriations Act, 2006 (P.L. 109-102)

EDUCATION FOR GIRLS

DEVELOPMENT ASSISTANCE

SEC. 523. Of the funds appropriated by titles II and III of this Act, not less than \$931,400,000 should be made available for humanitarian, reconstruction, and related assistance for Afghanistan: Provided, That of the funds made available pursuant to this section, not less than \$3,000,000 should be made available for reforestation activities: Provided further, That funds made available pursuant to the previous proviso should be matched, to the maximum extent possible, with contributions from American and Afghan businesses: **Provided further, That of the funds allocated for assistance for Afghanistan from this Act and other Acts making appropriations for foreign operations, export financing, and related programs for fiscal year 2006, not less than \$50,000,000 should be made available to support programs that directly address the needs of Afghan women and girls, of which not less than \$7,500,000 shall be made available for grants to support training and equipment to improve the capacity of women-led Afghan nongovernmental organizations and to support the activities of such organizations:** Provided further, That of the funds made available pursuant to this section, not less than \$2,000,000 should be made available for the Afghan Independent Human Rights Commission and for other Afghan human rights organizations.

REPORT LANGUAGE:

The conferees also agree to provide \$15,000,000 in basic education funding to expand and extend a pilot project to increase access to basic education by addressing the prohibitive fees that keep children, and particularly girls, out of school.

....

The conference agreement contains language, similar to that proposed by the House and Senate that provides that \$50,000,000 should be made available to support programs that directly address the needs of Afghan women and girls, of which not less than \$7,500,000 shall be made available for small grants to improve the capacity of women-led Afghan nongovernmental organizations.

MALARIA

SEC. 598. Of the funds appropriated under the heading 'Child Survival and Health Programs Fund', not less than \$100,000,000 should be made available for programs and activities to combat malaria: *Provided*, That such funds should be made available in accordance with country strategic plans incorporating best public health practices, which should include considerable support for the purchase of commodities and equipment including: (1) insecticides for indoor residual spraying that are proven to reduce the transmission of malaria; (2) pharmaceuticals that are proven effective treatments to combat malaria; (3) long-lasting insecticide-treated nets used to combat malaria; and (4) other activities to strengthen the public health capacity of malaria-affected countries:

REPORT LANGUAGE:

For malaria, the conference agreement provides a total of \$242,500,000. Of this amount, it is expected that \$139,500,000 of the contribution to the Global Fund will fund malaria programs, \$100,000,000 is funded through the 'other infectious diseases' allocation in this account, and an estimated \$3,000,000 is provided from other bilateral accounts. The conferees have long been concerned by the mortality and morbidity caused by this disease, and have made available more than \$657,500,000 since 2001 to fight malaria, consistently more each year than requested by the President.

HIV/AIDS

For necessary expenses to carry out the provisions of the Foreign Assistance Act of 1961 for the prevention, treatment, and control of, and research on, HIV/AIDS, \$1,995,000,000, to remain available until expended, of which \$200,000,000 shall be made available, notwithstanding any other provision of law, except for the United States Leadership Against HIV/AIDS, Tuberculosis and Malaria Act of 2003 (Public Law 108-25) for a United States contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria, and shall be expended at the minimum rate necessary to make timely payment for projects and activities.

REPORT LANGUAGE:

The conference agreement provides \$1,995,000,000 for 'Global HIV/AIDS Initiative' instead of \$1,920,000,000 as proposed by the House and \$2,020,000,000 as proposed by the Senate.

Funds in this account are allocated in the following table and, as stipulated in section 596, any change to these allocations is subject to the regular reprogramming procedures of the Committees on Appropriations:

Rewarding Developing Nations That Are Moving Forward With Political and Economic Development

For necessary expenses for the 'Millennium Challenge Corporation', \$1,770,000,000 to remain available until expended: Provided, That of the funds appropriated under this heading, up to \$75,000,000 may be available for administrative expenses of the Millennium Challenge Corporation:

REPORT LANGUAGE:

The conference agreement provides \$1,770,000,000 for the Millennium Challenge Corporation (MCC) instead of \$1,750,000,000 as proposed by the House and \$1,800,000,000 as proposed by the Senate.

....

The conferees understand that strong participation from indigenous civil society organizations is critical to increasing public support for and ensuring that the MCC successfully meets its intended goals of economic growth and poverty reduction. Such participation would also strengthen the nascent democratic processes in eligible countries, contribute to the MCC criteria of good governance, and provide opportunities for discussion of how best to achieve national priorities of economic growth and poverty reduction.

The conferees request that the Chief Executive Officer of the MCC submit a report that describes and assesses the record of national governance structures to take into account indigenous civil society input within countries that have completed compact negotiations. The report should be submitted to the relevant committees of jurisdiction identified in the MCC authorization no later

ing of the crisis and its resolution are impossible to predict.

The revenue projections start with the budget's estimate of receipts under the Administration's proposals. In the long run, receipts are assumed to increase as people's real incomes rise. The income tax is indexed for inflation, but not for real growth, so as real incomes rise, the effective income rate increases. This tendency is partly offset because many excise taxes are not indexed and therefore tend to decline in real terms as inflation pushes up the price level. Furthermore, payroll taxes are based on cash wages and the share of cash wages in total compensation and in overall GDP has been declining as workers receive a larger share of their compensation in the form of untaxed fringe benefits. These offsetting tendencies are not powerful enough, however, to prevent the overall tax share from rising somewhat in the long run. In the projections summarized in Table 13-2, the ratio of receipts to GDP rises to around 22 percent by the end of the 75-year period.³

In the past, these long-run budget projections have jumped off from the end point for the current budget. This year's Budget includes the effects of adding personal retirement accounts to Social Security. Personal accounts are one element within a set of larger reforms that would restore solvency to Social Security. The Administration has not yet specified a complete set of reforms to achieve solvency. Within the current budget horizon, these other reforms would not have significant budget effects. In the long range, however, their effects would be significant. Because these other reforms are not yet specified, the long-range projections shown here do not incorporate personal retirement accounts. Show-

ing the personal account proposal in isolation would give a distorted picture of the budget effects of comprehensive Social Security reform.

The long-run budget outlook is highly uncertain (see the technical note at the end of this chapter for a further discussion of the forecasting assumptions used to make these budget projections). With pessimistic assumptions, the fiscal picture deteriorates even sooner than in the base projection. More optimistic assumptions imply a longer period before the pressures of rising entitlement spending overwhelm the budget. But despite the unavoidable uncertainty, these projections clearly show that under a wide range of forecasting assumptions, the resources generated by the programs themselves will be insufficient to cover the long-run costs of Social Security and Medicare.

Alternative Economic, Technical, and Policy Assumptions

The quantitative results discussed above are sensitive to changes in underlying economic and technical assumptions. Some of the most important of these alternative economic and technical assumptions and their effects on the budget outlook are discussed below. They generally show that there are mounting deficits under most reasonable projections of the budget.

1. *Health Spending:* The projections for Medicare over the next 75 years are based on the actuarial projections in the 2005 Medicare Trustees' Report that include the effects of the Medicare Prescription Drug and Modernization bill enacted in 2003.⁴ Following the recommendations of its Technical Review Panel, the Medi-

³The Alternative Minimum Tax is also scheduled to take a growing share of income under current law, because its parameters are not indexed to inflation. That increase is not assumed to continue in these projections because it would imply a fundamental change in the tax system.

⁴The long-run projections do not incorporate the Administration's proposal for automatic spending reductions in Medicare if the program's future reliance on general revenues exceeds the threshold of 45 percent of expenditures established in the Medicare Modernization Act. This proposal is intended to encourage Congress and the President to reach agreement on reforms to slow Medicare spending to bring it back in line with the 45 percent threshold. Assuming that these automatic reductions would continue each year throughout the 75-year projection period would result in an unrealistic projection of Medicare spending.

Note: The figures shown in this table for 2015 and beyond are the product of a long-range forecasting model maintained by the Office of Management and Budget. This model is separate from the models and capabilities that produce detailed programmatic estimates in the Budget. It was designed to produce long-range forecasts based on additional assumptions regarding growth of the economy, the long-range evolution of specific programs, and the demographic and economic forces affecting those programs. The model, its assumptions, and sensitivity testing of those assumptions are presented in this chapter.

12. Abortion Statistics

July 20, 2005

MEMORANDUM FOR THE DEPUTY CHIEF OF STAFF

FROM: YUVAL LEVIN

SUBJECT: ABORTION DATA

The data regarding numbers and rates of abortion in the United States show a steady decline in abortions since the mid-1980s, which has continued through the latest available figures.

The tables on the next page are based on figures from the Guttmacher Institute, which collects and analyzes data both from the CDC and directly from abortion clinics. The Institute is affiliated with abortion rights groups, but all sides take the Guttmacher data to be the most reliable and solid numbers. (CDC's particular figures are not always exactly the same, but the year-to-year trends are the same). The latest available figures are for 2002. The 2003 figures are expected in late fall. [Note: 2003 figures not available at this time.](#)

There are three kinds of numbers relevant to following abortion trends:

- **Number of Abortions:** This is simply the raw number of abortions performed each year. The number is very troubling (at more than 1.2 million abortions a year) but it has been declining steadily from its highpoint in 1990. Note, however, that this figure is heavily affected by the number of pregnancies per year, which has also been declining modestly.
 - **The number of abortions is now the lowest it has been since 1976.**
- **Abortion Ratio:** The abortion ratio is the number of abortions per 1,000 live births. In terms of abortion trends, this is the most significant figure, since it is not skewed by changes in the rate of pregnancy over the years. This number reached its highpoint in 1983 and has been declining modestly but significantly ever since.
 - **The abortion ratio is the lowest it has been since 1975.**
- **Abortion Rate:** The abortion rate is the number of abortions per 1,000 women aged 15-44 in a given year. Here again the slight decline in the pregnancy rate plays a role, but the trend is the same.
 - **The abortion rate is the lowest it has been since 1975.**

The tables on the next page provide the figures for each since 1975—the first year for which abortion figures are considered reliable.

1/Some funding figures are estimates based on best available data. Program transfers may make some historical data comparisons inaccurate.

2/For Clean Coal, 2001 funding is net of \$95 million use of prior year balances. 2002 funding is net of \$34 million use of prior year balances.

3/For other Fossil Energy, 2001 funding is net of \$12 million use of prior year balances.

4/Footnote deleted - renumber others.

5/Comparable figures. These crosscuts did not exist in 2001.

6/\$269 million needed in 2008 to meet President's commitment to request \$1.2 billion over five years (2004-2008).

1/Some funding figures are estimates based on best available data. Program transfers may make some historical data comparisons inaccurate.

2/For Clean Coal, 2001 funding is net of \$96 million use of prior year balances. 2002 funding is net of \$34 million use of prior year balances.

3/For other Fossil Energy, 2001 funding is net of \$12 million use of prior year balances.

4/Footnote deleted - renumber others.

5/Comparable figures. These crosscuts did not exist in 2001.

6/\$269 million needed in 2008 to meet President's commitment to request \$1.2 billion over five years (2004-2008).

Note - Program Management costs not included in outyears.
